Can Type This:

$$F(x) = \frac{1}{\sqrt{2\pi}} \int_{-\infty}^x e^{-\frac{1}{2}y^2} dy \quad x = \prod_{j=1}^m \left\{ \frac{\sum_{i=1}^n a_{ij} + \sum_{i=1}^n b_{ij}}{\sum_{i=1}^n c_{ij} + \sum_{i=1}^n d_{ij}} \right\}$$

Within Your Documents

Using **EXACT**

And its WYSIWYG!

From LOTUS Magazine: November 1987

"Engineers, Scientists and Mathematicians who need to insert complicated mathematical expressions into their favorite wordprocessor should investigate EXACT, from Technical Support Software Inc. The RAM-resident program lets you see expressions on the screen as you create them and then lets you print them in your document. It comes with 20 fonts containing more than 1,500 characters and symbols. A demo disk is free."

Rich Friedman, Senior Editor.

$$\sigma^2 = \frac{\sum_{i=1}^n x_i^2 - \frac{1}{n} \left(\sum_{i=1}^n x_i \right)^2}{n-1}$$

$\forall \lambda \Rightarrow \Delta \exists \Phi \Gamma \Leftrightarrow \infty \int \sum \Lambda \rightarrow \leftarrow \circ \Pi \Theta \cup \Sigma \cap \Upsilon \blacksquare \Omega \Xi \Psi \Leftarrow \alpha \beta \chi \delta \epsilon \phi \gamma \eta \iota \nabla \kappa \lambda \mu \nu \omicron \pi \theta \rho \sigma \tau \upsilon \square \omega \xi \psi \zeta$

$$[D_{r,k}^n]^{-1} \equiv \int_0^R 2\pi r dr \int_{x_n - \frac{1}{2}h_n}^{x_n + \frac{1}{2}h_n} \left[\rho_k^n(r) \right] [D^{-1}(r,z)] \left[\rho_l^n(r) \right]$$

"...I can't imagine a mathematical expression EXACT will not handle."

Ernest Mau, Online Magazine

Book Review Editor: H. Läuter, Berlin

CSQ covers computational aspects of new and existing statistical techniques, assessing and comparing them. Statistical consultants and other users of statistics will be able to keep abreast of new developments as **CSQ** makes new ideas accessible to the professional statistical community. **CSQ** also stimulates the development of reliable software for statistical techniques by publishing assessments of programs. In the section "Software Notices" authors of well known packages write about new developments.

Papers discussing the following topics will be published in **CSQ**: Aspects of algorithmic or numerical methods in statistics or supporting fields of research – Branches of computer science involved in statistical computing, such as data management, statistical data bases, software design, and special programming languages – Developments in statistical software, evaluation or comparisons of statistical packages – Other fields related to computational statistics, such as the use of microcomputers in statistics or the influence of computers on the teaching of statistics.

Fields of interest: Statistics, computer sciences.

Indexed/Abstracted in: Current Index to Statistics, Mathematical Reviews, Zentralblatt für Mathematik.

**JOURNAL OF
CLASSIFICATION**

P. Arabie, Editor
University of Illinois

Journal of Classification publishes original and valuable papers in the fields of classification, numerical taxonomy, multidimensional scaling and other ordination techniques, clustering, tree structures and other network models, principal components analysis, factor analysis, and discriminant analysis as well as associated models and algorithms for fitting them. Issues contain articles, short notes and comments, software abstracts, and book reviews.
